

Centennial Woods Reclaimed Wyoming Snowfence

Centennial Woods reclaimed Wyoming snowfence is naturally dried for decades by one of the state's greatest natural resources: the Wyoming wind.

Combined with the open skies, clean air, intense sun and extreme winters, it's a legendary force of nature found only in the Cowboy State, and it produces an intensely beautiful, perfectly dried, strong and true reclaimed board.

Customers like Whole Foods Markets, Bass Pro Shops, Red Lobster, Chevy's Restaurants and numerous residential builders have used centennial woods' reclaimed boards to add texture, beauty and a natural ambiance to architecturally diverse spaces around the globe.

Eco-friendly builders and developers have also taken to our reclaimed Wyoming snowfence: in 2007 & 2008, Ken Pieper & Associates and Associates 3, respectively, selected Centennial Woods reclaimed Wyoming snowfence for the annual *Mountain Living* Natural Dream Home in Colorado. In 2008, The EcoBuilders and Whisper Mountain Homes also selected Centennial Woods reclaimed snowfence for the *Southern Living* Idea House in North Carolina.

No matter your purpose or project, Centennial Woods reclaimed Wyoming snowfence will add depth, story and a natural touch to your space.

Centennial Woods stands behind its products

Centennial Woods reclaimed snowfence is known for its consistent quality, color and texture. Knots, antique nails, nail holes and some variations in patina are part of its charm and should be expected. If you are not satisfied with your order, let us know within 10 days of delivery and we will work with you to make it right.

Specifications	
Length & Width	1 x 6 inch nominal 4 to 16 foot nominal random lengths
Special Order Options	Specific lengths (up to 16 feet), denailing, and milling are available at extra charge
Recommended Finishes	It is not necessary to finish Centennial Woods reclaimed wood from Wyoming snowfence. Our all-natural, untreated boards may remain unfinished and will maintain strength, beauty and texture without any future maintenance. Water-based finishes (including many fire-retardant coatings) commonly preserve the gray patina, while oil-based finishes can darken the gray while highlighting the red and yellow patinas that occur on some boards.
Overage	15% additional footage recommended, as is standard for lumber products
